

Marina Martinique and Social Responsibility

The Marina Martinique has a vision and values that show commitment to the neighbouring communities and the environment in which it operates. Social responsibility means community involvement and projects based on honesty, integrity, transparency and accountability. The Marina is committed to undertake a leading role with its community engagement, its investment and environmental practices. Stakeholders must know that the Marina is a reputable partner.

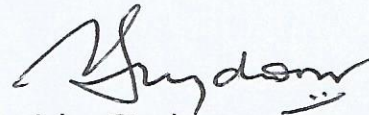

The Marina believes in giving back to the community. It is a core principle. It has a strong sense of community upliftment through financial support, volunteerism, security programs and a strive to contribute to the well-being of the neighbouring communities and selected charities.

The Marina envisages partnerships with organisations to provide annual support for funding special projects and to create lasting change and long-term results. Beneficiaries are mostly located in the broader neighbourhood and should be registered organisations and charities, preferably non-profit entities in a sound ethical state. The focus of assistance is to address needs in society, such as security, family and child welfare, poverty, animal welfare, nature conservation and sports activities with an emphasis on making the Marina's waterways available to swimming competitions.
